

Protect Your Client After Settlement by Ensuring MSA Compliance

Help your client be 100% compliant with Medicare guidelines & save money on their medical settlement dollars

CareGuard puts a team of healthcare advocates at your client's side...

Our healthcare experts protect your client's interests by coordinating their care and handling all reporting requirements with Medicare, if necessary.

Many insurance payers are offering to include CareGuard's services in the settlement so it is typically NO COST to your client.

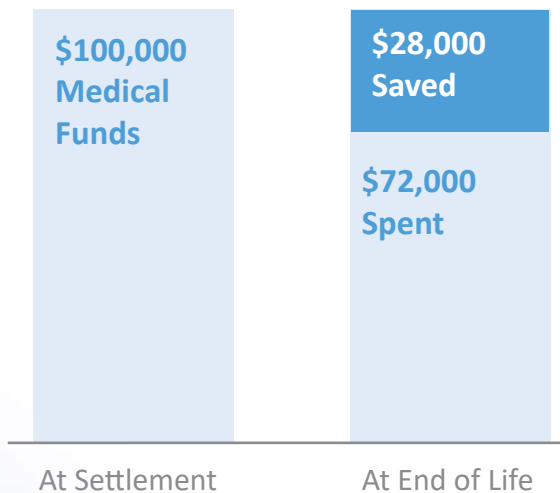

CareGuard never denies treatments related to the injury and ensures accurate and reduced rates are paid if it's an MSA (Medicare Set-Aside). There is no Utilization Review. **Your office will no longer receive calls about treatment denials or questions about Medicare reporting guidelines!**

CareGuard can also help settle cases where indemnity is closed but the medical remains open, potentially resulting in additional attorney fees. CareGuard addresses many concerns about medical costs so we may help settle these claims—moving them off your desk and often resulting in an extra fee from the carrier.

...saving your client an average of 28% off of the pricing in their settlement projection

The CareGuard card works like a traditional insurance card with no copays or extra charges, helping your client get the care they need.

CareGuard's prices allow your client to save money to pass on to their family, estate or beneficiaries.
